### Wooden system bollards

Wood is a vibrant and emotional material that conveys comfort, warmth and an affinity with nature. At the same time, wood boasts a high degree of durability. Designed for easy attachment to BEGA system bollard heads, wooden system bollard tubes are now available.

### Recessed wall redesign

With a refined look, increased light output, and contractor friendly enhancements for ease of installation and quality assurance, BEGA's unwavering commitment to quality above all permeates everything about this new approach to recessed wall luminaires.

### Façade illumination

Complementing the already popular linear façade system, BEGA's new in-ground and on-ground façade floodlights make it possible to fully illuminate any vertical surface from the ground up. Equally beautiful and effective, each approach offers a high degree of flexibility.
